

COMMODITIES

FIA's Power Trading Work

As part of FIA's work to support the global cleared derivatives industry, we monitor regulatory changes and operational challenges affecting global commodity markets, including the power trading markets. FIA engages our members from power, gas and related markets in Europe through our Power Trading Committee and the Power Trading Forum to address current issues and develop business best practices.

OUR FOCUS ON THE POWER TRADING MARKETS

FIA's work for the power and gas markets in Europe covers topics such as liquidity, market coupling, clearing and price benchmarks as well as operational and technology issues. Previous initiatives include contributing to the development of standardised documentation for use in the wholesale market as well as industry benchmarks of good practice.

There are multiple avenues for your firm to participate in FIA's work related to these markets:

- **Power Trading Committee:** contributes to FIA's work on advocacy issues that have an impact on the power trading markets, develops best practices related to the trading, operations and overall structure of the cleared energy space and tracks and helps influence the direction of regulation that may impact FIA members. The Power Trading Committee forms a vital part of FIA's broader work within commodities markets.
- **Power Trading Forum:** is a regular gathering point of FIA's power trading members, relevant market infrastructure providers, vendors and professional services providers. Participants receive valuable updates on key market and regulatory developments. The Forum serves as a platform for the Power Trading Committee to share its current efforts and collect broader input on major issues. Non-FIA members may attend these events on request.
- **Power Trading Dinner:** is an annual black-tie event each autumn where FIA members as well as non-member firms from the power trading community network with one another, their clients and other industry players.

FIA members also benefit from educational webinars, regular newsletters and industry events. Members may participate in other FIA member forums.

WHO'S INVOLVED

The Power Trading Committee brings together the key constituents of the power, gas and related markets. In addition to core financial intermediaries, a number of specialist commodity houses and energy firms participate, such as Drax Power, Castleton Commodities, Freepoint Commodities, Hartree Partners, Mercuria Energy Trading SA, Trafigura Derivatives Ltd, Vitol SA, Centrica Energy, Chevron Global Trading, EDF Trading Ltd, Petroineos Refining and Trading, Phillips 66 TS Limited, RWE Trading GMBH, Scottish Power Energy Trading, Shell International and BP Corporation North America.

The Forum also represents market infrastructure through a range of technology vendors as well as specialist exchanges, clearing houses, and trading venues, including European Energy Exchange, ICE, Nord Pool Spot and Trayport.

JOIN TODAY!

- If you are an FIA member and would like further information on participating in the FIA Power Trading Committee or attending an upcoming Power Trading Forum, please contact Christiane Leuthier (cleuthier@fia.org).
- If you are not an FIA member and would like further information on the Power Trading Committee, please contact joinfia@fia.org.

FIA is the leading global trade organization for the futures, options and centrally cleared derivatives markets, with offices in London, Singapore and Washington, D.C. FIA's membership includes clearing firms, exchanges, clearinghouses, trading firms and commodities specialists from more than 48 countries as well as technology vendors, lawyers and other professionals serving the industry. FIA's mission is to support open, transparent and competitive markets, protect and enhance the integrity of the financial system, and promote high standards of professional conduct. As the principal members of derivatives clearinghouses worldwide, FIA's member firms play a critical role in the reduction of systemic risk in global financial markets.
